

Solaris Home Systems

Services

Smart Home Automation – Provides monitoring and real-time feedback about how “green” a home is at any given moment including energy usage, water usage and ones’ carbon footprint.

Solar Photovoltaic – Direct grid-tied solar PV systems for electricity usage.

Solar Water Heating – Covers 90% of hot water needs through a roof-mounted solar collector.

Secure Access Control – Control access to the home through a keypad with built-in RFID reader that replaces the lock on the door.

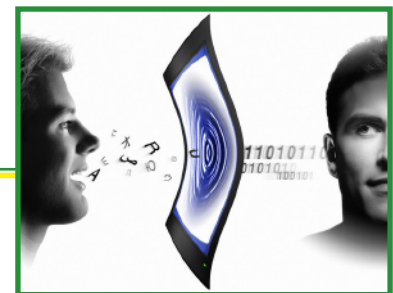

Lighting Control – Create entire home ambiance through the ease of a simple one-push button interface.

Whole Home Internet – Built-in wired and wireless internet access in every room.

Voice Recognition and Production System

– Custom-program responses with a range of personalities to provide for human functional needs – i.e.: home greeting, pending phone messages, open doors and windows, guest/intruder notification and much more.

Irrigation Control – Adjust water settings based on necessity-connection to online weather forecasts.

Call us today about our customizable solutions for new construction and existing home retrofits.
